

Natas Level 2 - Level 3

Upon logging in, we are presented with a page that says 'There is nothing on this page'. Lets command + u.

Focusing on the body of the content.

```
<body>
<h1>natas3</h1>
<div id="content">
There is nothing on this page
<!-- No more information leaks!! Not even Google will find it this time... -
->
</div>
</body></html>
```

This appears to reference an ability not to allow google and other search sites to access your site. This file in question is the robot.txt. Lets try and access it. The URL would be: view-source:<http://natas3.natas.labs.overthewire.org/robots.txt>

```
User-agent: *
Disallow: /s3cr3t/
```

This 'disallow' field looks like a directory path. Lets try and access that.

```

Inspecting the code, we see another user.txt file, lets click on that.
